## **Maybank completes RM1.2 bil sukuk issuance for Tier 2 capital**

Malayan Banking Bhd announced that it has completed the issuance of RM1.2 billion in subordinated sukuk murabahah under its sukuk programme of up to RM30 billion.

In a bourse filing with Bursa Malaysia, Maybank said the sukuk qualifies as Tier 2 capital for the bank. This aligns with Bank Negara Malaysia's capital adequacy framework that sets credit risk capital calculation standards in accordance with international Basel III standards.

Proceeds from the issuance will be deployed for shariah-compliant purposes, including investments in approved Islamic financial instruments, funding Islamic business activities across its subsidiaries and overseas branches, as well as other eligible business activities, it said.

The sukuk issuance, comprising three tranches with maturities ranging from 10 to 15 years, has been assigned an AA1 rating with a stable outlook by credit rating agency RAM Rating Services Bhd.

Maybank shares closed six sen or 0.5% lower at RM11.18 on Wednesday, valuing the banking group at RM135.2 billion. – The Edge Malaysia

## **Banking tokenisation must be phased and measured — BNM assistant governor**

Bank Negara Malaysia (BNM) said tokenisation in banking must be implemented in a “phased and measured” manner, with interoperability, governance and risk controls embedded from the outset, as the central bank seeks to balance financial innovation with monetary and financial stability.

Assistant governor Dr Norhana Endut said the central bank is working with industry players through its Digital Asset Innovation Hub to identify practical use cases for tokenisation while exploring the regulatory safeguards needed for wider adoption.

Among the use cases being explored are programmable money, tokenised deposits, atomic settlement and improved liquidity and collateral management, which Norhana said could lead to faster, cheaper and more transparent financial transactions.

“We want to actually design an appropriate regulatory framework that would promote responsible innovation but at the same time ensure that monetary and financial stability is being preserved,” she said during a panel discussion at The Asian Banker Summit 2026 on Wednesday. – The Edge Malaysia

## 10-year Treasury yield hits new high for the year after very hot producer prices reading

The 10-year U.S. Treasury note yield moved higher on Wednesday as investors digested the implications of hotter-than-expected wholesale prices in April.

The yield on the 10-year note — the key benchmark for U.S. government borrowing — was last up less than 1 basis point at 4.473%. It had risen as much as 3 basis points to hit a high of 4.49%, reaching its highest level since July 17.

The 2-year Treasury note yield, which more closely tracks short-term Federal Reserve interest rate policy, was more than 1 basis point lower at 3.981%. The longer-dated 30-year Treasury bond yield was up more than 1 basis point at 5.042%. It had earlier advanced 2 basis points to 5.05%, its highest level since July 17.

The producer price index rose a seasonally adjusted 1.4% for the month, much higher than the 0.5% Dow Jones consensus forecast and the upwardly revised 0.7% March increase. This was the largest monthly gain since March 2022.

On an annual basis, the index was up 6%, the biggest increase since December 2022. — CNBC
