SC unveils sukuk PRISMA to attract global funding for climate resilience

THE Securities Commission Malaysia (SC) has introduced Sukuk PRISMA, a new sustainable sukuk framework aimed at attracting global capital to finance climate adaptation and resilience projects, including flood mitigation, coastal protection and power grid infrastructure.

The initiative was unveiled by Natural Resources and Environmental Sustainability Minister Datuk Seri Arthur Joseph Kurup at the 31st United Nations Climate Change Conference (COP31) in Antalya, Türkiye, today.

Building on Malaysia's Sustainable and Responsible Investment (SRI) Sukuk framework introduced in 2014, Sukuk PRISMA expands the scope of sustainable financing beyond traditional green and social projects to include climate adaptation, resilience and transition financing.

The framework will support sukuk issuances denominated in ringgit and major foreign currencies, allowing issuers to tap international investors for projects involving flood protection, agriculture and more resilient energy infrastructure. – The Malaysian Reserve

LBS Bina doubles sukuk programme size to RM1.5b

LBS Bina Group Bhd (KL:LBS) said it has doubled the size of its sukuk programme to RM1.5 billion from RM750 million.

The upsize in the programme's limit was made on Tuesday pursuant to the Securities Commission Malaysia's guidelines on unlisted capital market products, said the property developer in a bourse filing.

"Save for the increase in the programme limit to RM1.5 billion, the other principal terms and conditions of the Sukuk Wakalah Programme remain unchanged including among others, credit rating of AA-IS with a stable outlook assigned by MARC Ratings Bhd and utilisation of proceeds," it said.

LBS Bina lodged its sukuk programme in November 2023.

Proceeds raised from the Islamic debt papers will be for capital expenditure, investments, working capital and refinancing.

Shares of LBS Bina ended unchanged at 35.5 sen on Tuesday, valuing the group at RM549.69 million. – The Edge Malaysia

US yields ease as oil prices drop 3%

US Treasury yields declined on Monday, with a more than 3% drop in oil prices easing some inflation worries after last week's sharp rise in yields.

Signs of recovering oil flows through the Strait of Hormuz bolstered expectations of surplus supply and drove down oil prices. The International Energy Agency said on Friday that the global oil market will return to a surplus in the fourth quarter of this year.

The Iran war, which began in February, has driven up oil prices and worries about inflation. In addition, data last week showed US consumer prices rose more quickly than expected in October.

That, along with recent hawkish Federal Reserve official comments, had prompted markets to factor in more interest rate hikes in coming months.

Yields were sharply higher last week as traders saw rising chances that the Fed could hike rates by a larger-than-usual 50 basis points in December, or raise rates by 25 basis points at each of the next three meetings. Two-year yields on Friday registered their biggest weekly jump in two years. – The Star
