The following tables summarise the contractual or underlying principal amounts of trading derivatives and financial instruments held for hedging purposes. The principal or contractual amounts of these instruments reflect the volume of transactions outstanding at the end of the reporting period, and do not represent amounts at risk.

Trading derivative financial instruments are revalued on a gross position basis and the unrealised gains or losses are reflected in "Derivative Financial Instruments" Assets and Liabilities respectively.

## A23. DERIVATIVE FINANCIAL INSTRUMENTS (Continued)

The Group's and the Company's derivative financial instruments are subject to market, credit risk and liquidity risk, as follows:

### **Market Risk**

Market risk is defined as any fluctuation in the value arising from changes in value of market risk factors such as interest rates, currency exchange rates, credit spreads, equity prices, commodities prices and their associated volatility. The contractual amounts provide only a measure of involvement in these types of transactions and do not represent the amounts subject to market risk. The Group's risk management department monitors and manages market risk exposure via stress testing of the Group's Value-at-Risk (VaR) model, in addition to reviewing and analysing its treasury trading strategy, positions and activities vis-à-vis changes in the financial market, monitoring limit usage, assessing limit adequacy, and verifying transaction prices.

### **Credit Risk**

Credit risk arises when counterparties to derivative contracts, such as interest rate swaps, are not able to or willing to fulfil their obligation to pay the Group the positive fair value or receivable resulting from the execution of contract terms. As at 31 December 2016, the amount of credit risk in the Group and the Company, measured in terms of the cost to replace the profitable contracts, was RM12,006,184,000 and Nil respectively (2015: RM11,708,849,000 and RM74,000 respectively). This amount will increase or decrease over the life of the contracts, mainly as a function of maturity dates and market rates or prices.

### **Liquidity Risk**

Liquidity risk on derivatives is the risk that the derivative position cannot be closed out promptly. Exposure to liquidity risk is reduced through contracting derivatives where the underlying items are widely traded.

### **Cash requirements of the derivatives**

Cash requirements of the derivatives may arise from margin requirements to post cash collateral with counterparties as fair value moves beyond the agreed upon threshold limits in the counterparties' favour, or upon downgrade in the Bank's credit ratings. As at 31 December 2016, the Group has posted cash collateral of RM4,806 million (31 December 2015: RM5,384 million) on their derivative contracts.

There have been no changes since the end of the previous financial year in respect of the following:

- a) the types of derivative financial contracts entered into and the rationale for entering into such contracts, as well as the expected benefits accruing from these contracts;
- b) the risk management policies in place for mitigating and controlling the risks associated with these financial derivative contracts; and
- c) the related accounting policies.

The above information, policies and procedures in respect of derivative financial instruments of the Group are disclosed in the audited annual financial statements for the financial year ended 31 December 2015 and the Risk Management section of the 2015 Annual Report.

## A24. COMMITMENTS AND CONTINGENCIES

(a) In the normal course of business, the Group enter into various commitments and incur certain contingent liabilities with legal recourse to its customers. No material losses are anticipated as a result of these transactions. The commitments and contingencies are not secured over the Group's assets except for certain financial assets held for trading being pledged as credit support assets for certain over-the-counter derivative contracts.

## A27. FAIR VALUE ESTIMATION

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

### Determination of fair value and fair value hierarchy

The fair value hierarchy has the following levels:

Level 1 - Inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 - Inputs to the valuation methodology include:

- Quoted prices for similar assets and liabilities in active markets; or
- Quoted prices for identical or similar assets and liabilities in non-active markets; or
- Inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 - One or more inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Assets/liabilities are classified as Level 1 when the valuation is based on quoted prices for identical assets or liabilities in active markets.

Assets/liabilities are regarded as being quoted in an active market if the prices are readily available from a published and reliable source and those prices represent actual and regularly occurring market transactions on an arm's length basis.

When fair value is determined using quoted prices of similar assets/liabilities in active markets or quoted prices of identical or similar assets and liabilities in non-active markets, such assets/liabilities are classified as Level 2. In cases where quoted prices are generally not available, the Group determines fair value based upon valuation techniques that use market parameters as inputs. Most valuation techniques employ observable market data, including but not limited to yield curves, equity prices, volatilities and foreign exchange rates.

Assets/liabilities are classified as Level 3 if their valuation incorporates significant inputs that are not based on observable market data. Such inputs are determined based on observable inputs of a similar nature, historical observations or other analytical techniques.

If prices or quotes are not available for an instrument or a similar instrument, fair value will be established by using valuation techniques or Mark-to-Model. Judgment may be required to assess the need for valuation adjustments to appropriately reflect unobservable parameters.

The valuation models shall also consider relevant transaction data such as maturity. The inputs are then benchmarked and extrapolated to derive the fair value.

### Valuation Model Review and Approval

- Fair valuation of financial instruments is determined either through Mark-to-Market or Mark-to-Model methodology, as appropriate;
- Market Risk Management is mandated to perform mark-to-market, mark-to-model and rate reasonableness verification. Market price and/or rate sources for Mark-to-Market are validated by Market Risk Management as part and parcel of rate reasonableness verification;
- Mark-to-Model process shall be carried out by Market Risk Management within Group Risk. Group Risk Management Quantitative Analysts are responsible for independent evaluation and validation of the Group's financial models used for valuation;
- Valuation methodologies for the purpose of determining Mark-to-Model prices will be verified by Group Risk Management Quantitative Analysts before submitting to the Group Market Risk Committee for approval;
- Group Risk Management Quantitative Analysts are the guardian of the financial models and valuation methodologies. Market rate sources and model inputs for the purpose of Mark-to-Model must be verified by Group Risk Management Quantitative Analysts and approved by Regional Head, Market Risk Management and/or the Group Market Risk Committee;
- Model risk and unobservable parameter reserve must be considered to provide for the uncertainty of the model assumptions;
- The Group's policy is to recognise transfers into and transfers out of fair value hierarchy levels as of the date of the event or change in circumstances that caused the transfer; and
- Independent price verification process shall be carried out by Market Risk Management to ensure that financial assets/liabilities are recorded at fair value.

**B1. GROUP PERFORMANCE REVIEW COMPARISON WITH THE PRECEDING QUARTER'S RESULTS**

**CIMB Group Holdings Berhad (“CIMB Group” or the “Group”) results**

CIMB Group Holdings Berhad (“CIMB Group” or the “Group”) reported a Profit Before Tax (“PBT”) of RM4.88 billion for financial year 2016 (“FY16”). On a year-on-year (“Y-o-Y”) basis, the Group’s FY16 operating income expanded 4.4% with operating expenses remaining well under control. This translated to an 8.6% Y-o-Y improvement in pre-provisioning operating profit (“PPOP”) and a 4.5% Y-o-Y improvement in the Net Profit to RM3.56 billion compared to the Business As Usual (“BAU”) FY15 Net Profit of RM3.41 billion. The FY16 net earnings per share (“EPS”) stood at 41.00 sen with a net return on average equity (“ROE”) of 8.3%. The Group declared a second interim net dividend of 12.00 sen per share to be paid via cash or an optional Dividend Reinvestment Scheme (“DRS”). For FY16, the total dividend amounted to 20.00 sen or RM1.76 billion, translating to a dividend payout ratio of 49.5% of FY16 profits.

The Group reported the highest ever revenue of RM16.07 billion and a 4.5% Y-o-Y increase in net profit to RM3.56 billion, amidst a trying business environment in 2016. Across the Group, its overhead expenses increased by only 1% Y-o-Y, contributing to the encouraging Cost-to-Income ratio. The Group’s balance sheet continued to strengthen with a commendable 8.7% Y-o-Y growth in loans, with positive CASA momentum, particularly in CIMB Niaga. The Group’s capital management efforts have strengthened its CET1 to 11.3% from 10.3% in 2015. The Group has declared a 12.00 sen second interim dividend, resulting in a 49.5% payout ratio for FY16.

The best performing segment was Consumer, which contributed 46% of PBT, with Thailand posting its first annual profit since acquisition. For Commercial Banking, both Malaysia and Indonesia performed well, although this was tempered by higher provisions in Singapore and Thailand. Wholesale Banking recorded a commendable 11.3% growth in PBT, with strict cost controls and declining provisions.

The disciplined recalibration of its business under T18 has strengthened the Group’s foundation to help negotiate the unexpected challenges of 2016. This is reflected in the Group’s key financials and remain on track to achieve most of its T18 targets by 2018.

**CIMB Group FY16 Y-o-Y Results**

For comparative purposes, the Y-o-Y performance is based on BAU numbers for FY15. CIMB Group’s FY16 operating income grew 4.4% Y-o-Y to RM16.07 billion underpinned by a 5.3% rise in net interest income. The FY16 non-interest income grew by 2.2% Y-o-Y, inclusive of a RM150 million gain from the sale of its 51% interest in PT CIMB Sun Life in 3Q16. Operating expenses rose by 1.0% Y-o-Y although it was 1.7% lower after excluding foreign currency translation effects, reflecting benefits from the cost management initiatives. This brought about the 8.6% improvement in the Group’s Pre-Provisioning Operating Profit (“PPOP”). The Group’s PBT was 6.2% higher at RM4.88 billion, with loan provisions rising 11.1% Y-o-Y.

The Group’s Regional Consumer Bank PBT increased by 35.0% Y-o-Y in FY16 to RM2.27 billion, making up 46% of Group PBT. The stronger performance was fuelled by the Consumer operations in Malaysia, Indonesia and Thailand, as well as lower overhead expenses and provisions. While the Regional Commercial Banking’s revenues grew with costs staying relatively flat, the PBT was 55.3% lower Y-o-Y at RM283 million due to higher provisions in Thailand and Singapore. The Group’s Regional Wholesale Banking PBT was 11.3% higher Y-o-Y at RM1.96 billion with an improvement in all operating divisions. Group Asset Management and Investments (“GAMI”)’s PBT was 2.5% lower Y-o-Y due to investment impairments, while Group Funding PBT was 50.3% lower Y-o-Y from higher cost of funds and FX translation costs.

Non-Malaysia PBT contribution to the Group rose to 22% in FY16 compared to 21% in FY15. Indonesia’s PBT expanded by 134.6% Y-o-Y to RM922 million as CIMB Niaga’s financial performance continued to improve. Thailand’s PBT contribution of RM14 million was 90.8% lower Y-o-Y as a result of higher loan provisions. Total PBT contribution from Singapore was 36.2% lower at RM241 million on the back of slower loans growth and higher Commercial Banking provisions.

The Group’s total gross loans (excluding the bad bank) grew by 8.7% Y-o-Y, while total deposits grew 5.6% Y-o-Y. The Group’s loan to deposit (“LDR”) ratio stood at 95.6% compared to 92.9% in FY15.

The Group’s gross impairment ratio rose to 3.3% as at December 2016 from 3.0% in December 2015, with a lower allowance coverage of 79.8%. The Group’s Cost-to-Income ratio improved to 53.9% compared with 55.6% in FY15, in line with the improved revenues and strict cost control measures. The Group’s net interest margins (“NIM”) was marginally lower at 2.63% for FY16 mainly driven by higher cost of deposits in Malaysia.

As at 31 December 2016, CIMB Group’s total capital ratio stood at 16.4% while the Common Equity Tier 1 (“CET1”) capital ratio continued to strengthen to 11.3%.

**CIMB Group 4Q16 Q-o-Q and Y-o-Y Performance**

On a Q-o-Q basis, 4Q16 operating income was 4.6% higher at RM4.31 billion, with net interest income growing 7.9% and partially offset by a 2.3% decline in non-interest income. Consumer Banking PBT rose 6.9% Q-o-Q largely on the back of regional loans growth and an improved performance in Indonesia. While the Regional Commercial Banking’s revenues are growing with costs staying under control, the PBT was 136.9% lower Q-o-Q due to higher provisions in Thailand and Singapore. Wholesale Banking PBT improved 28.4% Q-o-Q underpinned by a stronger performance in corporate banking. GAMI PBT was 54.1% lower Q-o-Q due to investment impairments, while Group Funding PBT was 80.8% lower Q-o-Q mainly due to the RM150 million gain from the sale of PT Sun Life recognised in 3Q16. The Group’s 4Q16 net profit was 16.5% lower Q-o-Q at RM854 million due to the PT Sun Life gain in 3Q16 and improved net interest income, partially offset by higher provisions from Thailand.

Consumer Banking PBT grew 41.6% driven by regional loans growth and an improved performance in Indonesia. Commercial Banking PBT declined 118.1% Y-o-Y principally from higher provisions in Thailand and Singapore, while the 28.4% growth in Wholesale Banking PBT was attributed to stronger revenues and lower provisions.
